

*To Inspire ... To Innovate ... To Include*

Innovative LIFE Options is a non-profit organization that promotes self-directed living in Manitoba through three unique support options. We believe that support networks and assisted decision making are fundamental in building a self-directed life. Full inclusion and citizenship is the benchmark that guides our work.

## In the Company of Friends

A funding model offered to Manitobans with an intellectual disability who are interested in self-directing and managing their own lives.

People choose this model to explore community, citizenship and relationships.

In the Company of Friends offers a flexible, individualized, and person centered framework where people hire their own staff, increase independence, and foster meaningful relationships with their support networks.

## Community Navigator

Supports Manitobans in the navigation of existing services as well as identifying and responding to gaps in service delivery.

The Community Navigator builds capacity of individuals, families, and communities through listening, connection, networking, collaboration, innovation, and the development of creative solutions.

## Options for Services

Available to Manitobans on a fee for service basis providing flexible, creative, and customizable administrative support in areas such as human resources, payroll, business set up, and financial reporting.

Options for Services develops the capacity of individuals, families, and support networks to manage their own services confidently and sustainably.
